Nurse's Corner

~February is National Children's Dental Health Month. Children should start seeing a dentist for cleanings at about three years of age. Children and adults should have their teeth cleaned two times a year. Don't wait until there is pain or a problem before going to the dentist. Cavities are preventable or can be kept minimal if found early. Use of an over the counter fluoride toothpaste along with flossing will help protect teeth.

~This month is also National Heart Month. Have you had your cholesterol checked regularly? Early intervention and prevention are key to
